UAlbany Showcase 2026: Presenter Registration Portal

All questions below are required unless otherwise noted. If you have any questions about your Showcase registration, please email showcase@albany.edu.

Please be aware of the following requirements:

- **Advisor approval:** Student presenters must discuss the presentation format, and share their presentation's title and abstract with their Showcase advisor and work closely with them to make sure it is complete before submitting this form. By completing this form, you will acknowledge that you have the advisor's approval.
- **One submission per presentation:** Students may present on their own or as part of a group. If you are presenting on your own, please complete this form for your presentation. If you are presenting as part of a group, please make only **one** submission for the group presentation. This means that if you are presenting as a group, please select one student to complete this form on behalf of the group. We recommend you complete your submission while meeting as a team, as you will be asked detailed questions about each presenter. For group presentations larger than 20 students, you must email showcase directly to provide presenter information and convey the details of the large group presentation at showcase@albany.edu.
- For group presentations with more than 20 presenters, please email showcase directly with the presentation information: showcase@albany.edu
- **Accessibility:** Student presenters who require reasonable accommodation for a disability or pregnancy-related condition to participate in Showcase Day should

email a request to showcase@albany.edu by April 15, 2026.

For additional guidance, please visit the [Student Presenter Guidelines](#) webpage on the Showcase website.

Please contact your Showcase Advisor with any questions. If you need additional assistance, please email showcase@albany.edu and CC your Showcase Advisor.

Presentation Information

1. How many students are involved in this presentation? Please provide a number: *

Student Presenter 1

2. Presenter Full Name *

First Name

Last Name

3. Presenter UAlbany student ID number (eg 001234567, do no use your netID) *

4. Presenter UAlbany Email Address *

example@albany.edu

5. Please select the campus roles that apply to the presenter.

Student athlete
Honors College student
EOP Student
First-Gen Student
Student Organization Eboard Officer
Prefer not to say
None of the above

Student Presenter 2 *

Brian

First Name

Allen

Last Name

Student Presenter 2 UAlbany student ID number (eg 001234567, do no use your netID) *

001560439

Student Presenter 2 UAlbany Email Address *

ballen3@albany.edu

example@albany.edu

Please select the campus roles that apply to presenter 2.

Student athlete
Honors College student
EOP Student
First-Gen Student
Student Organization Eboard Officer
Prefer not to say
None of the above

Student Presenter 3

Mahib

First Name

Rahman

Last Name

Student Presenter 3 UAlbany student ID number (eg 001234567, do no use your netID) *

001516161

Student Presenter 3 UAlbany Email Address *

marahman@albany.edu

example@albany.edu

Please select the campus roles that apply to presenter 3.

Student athlete
Honors College student
EOP Student
First-Gen Student
Student Organization Eboard Officer
Prefer not to say
None of the above

6. Presentation Title *

Predicting Marathon Race Performance Using Machine Learning

7. Presentation Abstract (150 words maximum) *

This project explores machine learning–based prediction of marathon finish times using real-world data from the 2023 Boston Marathon. Leveraging a dataset of 26,598 runners, we formulate the task as a supervised regression problem, where the goal is to predict a runner's net finish time in seconds based on demographic and performance-related features such as age range, gender, and intermediate split times. After cleaning and preprocessing the data, including handling missing values and encoding categorical variables, we implement two predictive models: a baseline linear regression model and a neural network regression model. Model performance is evaluated using Mean Absolute Error (MAE) and Root Mean Squared Error (RMSE). By comparing these approaches, we assess whether the neural network's ability to capture nonlinear relationships leads to improved predictive accuracy. This work demonstrates how machine learning can be applied to real-world athletic performance analytics.

140/150

8. Presentation format (Select 1) *

Please Select

- a. Poster
- b. Slideshow
- c. Panel
- d. Demonstration
- e. Art Installation
- f. Performance
- g. Asynchronous virtual presentation
- h. Synchronous virtual presentation

View the Presentation Guidelines to ensure you select the correct format.

A poster presentation is a visually engaging, printed or digital display that summarizes key points of a project or research for attendees to read at their own pace. Poster presentations will be scheduled in one-hour blocks, during which you will repeat your presentation several times to the different attendees who approach your poster.

11. If your presentation is for a class assignment, list the Course Number and Course Name for the class. Enter "N/A" if your presentation is not for a class assignment. [Course Number & Name example: APSY 101 Introduction to Psychology] *

IECE 465: Introduction to Machine Learning

IECE 465: Introduction to Machine Learning for Engineers

12. Please select the lead school or college that was involved in the work you are presenting: *

Please Select
College of Arts & Sciences
College of Emergency Preparedness, Health & Safety
College of Integrated Health Sciences
College of Nanotechnology, Science, and Engineering
Massry School of Business
Rockefeller College of Public Affairs & Policy
School of Education
Other (UUNI, WCI, RNA, Minerva Center)

College of Nanotechnology, Science, and Engineering

13. Please select the lead academic department that was involved in the research/work you are presenting: *

East Asian Studies
Economics
Educational and Counseling Psychology
Educational Policy & Leadership
Educational Theory and Practice
Electrical & Computer Engineering
Emergency Management and Homeland Security
English
Environmental & Sustainable Engineering
Environmental Health Sciences

14. Does your presentation align with any of the following areas? (Select all that apply)

☐ Artificial Intelligence☐ Climate Science/Sustainability☐ Global Engagement☐ Justice, Equity, Diversity and Inclusic☐ Community/Public Engagement☐ Public Policy☐ RNA Institute☐ None of the above**15. Showcase Advisor's Full Name ***

First Name

Last Name

16. Showcase Advisor's Email Address *

example@albany.edu

Acknowledgements

Please read the acknowledgements listed below carefully before making your selections.

18. By submitting this form, I confirm that all student presenters listed above will participate in UAlbany Showcase on Thursday, April 30, 2026. *

☒ Yes, I confirm.

19. By submitting this form, I confirm that the Showcase Advisor listed above has reviewed the presentation title and abstract listed above and has approved both for submission. *

☒ Yes, I confirm.

20. By submitting this form, I confirm that the information provided may be used in the conference program, promotions and website. *

☒ Yes, I confirm.
